

Maksaud Ahmed

DevOps Engineer

Profile

I am a self-taught programmer with 1-year experience as a software developer. I have grasped a deep understanding and practice of the Agile methodologies, became adept at using DevOps tools such as Ansible and have become an excellent team player as my work often has elegant structure, clear, and my honest words often motivates others. I practice my craft daily by creating personal projects or attempting exercises on Leetcode making my skills efficient. I have a large array of personal projects on my GitHub that speaks for itself. I can effectively manage my time and tasks giving me the ability to be efficient while having a healthy balance between work and life making me motivated and healthy.
